SOLUTION

Core Functional Requirement

Smart Invoice Numbering & Versioning

Automatic invoice number generation (e.g., *INV-2026-CLIENT01-0005*) with invoice revision history to track edits after invoice submission.

Work Productivity Score

Dashboard-based productivity insights by comparing estimated hours with actual tracked hours, showing on-time task percentage and weekly productivity score.

Client Trust Level / Rating System

Automatic client rating based on payment behavior such as on-time payments, delays, and overdue invoices to identify reliable and risky clients.

Automated Invoice Reminders

System-generated invoice reminders sent before, on, and after the due date through notifications and email alerts.

Soft Delete & Archive System

Clients and projects are archived instead of permanently deleted, ensuring data safety and easy recovery.

Multi-Currency Invoice Support

Invoice generation with selectable currency (INR, USD, EUR) and manual conversion rate input for international clients.

Core Non-Functional Requirement

Built for Performance & Reliability

Security First

JWT authentication ensures secure access and protected user data

Fast & Reliable

Optimized performance with high availability and minimal downtime

User-Friendly Design

Responsive interface accessible across all devices

Scalable Architecture

Modular design supports future growth and easy maintenance

High accuracy in time tracking and invoice calculations ensures you never miss billable hours or make costly errors
