Workbench

DE

Workbench API Integrated

Track one task at a time with backend-controlled timer flow.

Live state now comes from your Workbench APIs: overview, projects, tasks, active timer, and time entries with sync controls.

Backend timer controls | Online + sync-ready entries

CURRENT ACTIVE TIMER

00:02:48

PAUSED Demo Analytics Dashboard - Testing & QA

Timer Controls

Select project and task, then control your billable timer.

Project: Demo Analytics Dashboard

Task: Demo Analytics Dashboard - Testing & QA

Resume Task | Pause | Break | Stop

Break reason (optional)

Stop note (optional)

Selected Task Running Time	Break Time	Billable
00:02:48	00:00:00	$0.00

Manual Time Entry

Uses `POST /workbench/time-entries/manual/` with selected project/task.

API Live

0 | 0 | Note (optional) | Add Manual Time

Task In Focus

Detailed context for the task currently selected.

Demo Analytics Dashboard - Testing & QA

Select a task to see details.

Due date	-
Estimate	20h
Hourly rate	$0.00

Active Session Stats Live

Tracked	0.05h
Break	0.00h
Billable value	$0.00

Project Task Board

Task list is loaded from `GET /workbench/projects/<project_id>/tasks/`.

Freelancer Overview

Track workload, budget health, and billable utilization.
